PROJECT

Detecting fraudulent employment listings NLP-enhanced
multilayer perceptron (01/2024 - 06/2024)

- The evolution of job search processes influenced by technological advancements, particularly in social media and internet recruitment.
- While these platforms have expanded job opportunities, they've also led to an increase in fake job postings, causing potential harm to job seekers.
- To address this issue we use EMSCAD employment scam agean Dataset to identify the fake job advertisements and posts. By using Python programming, machine learning, algorithms like Random forest, support vector machine (SVM) and k-nearest neighbors (KNN).

CERTIFICATES

- Python programming certificate in SKILLVERTEX
